

VNEUROSCIENCE INITIATIVE

PARTICIPATING INSTITUTIONS

Academic

- Eastern Virginia Medical School
- George Mason University
- Old Dominion University
- University of Virginia
- Virginia Commonwealth University
- Virginia Tech
- William & Mary

Medical Centers

- Carilion Clinic
- Inova Health System
- Sentara Healthcare
- UVA Health System
- VCU Health

VBHRC **V**CATALYST

Virginia Catalyst instituted the Virginia Neuroscience Initiative (VNI), an innovative, statewide collaborative approach that brings together neuroscientists, medical providers, and industry partners who share a common mission to accelerate basic research on the nervous system and the clinical testing of new treatments for various neurological disorders.

NEUROSCIENCE INITIATIVE

strength through collaboration

NEUROSCIENCE DIRECTORY

Members of the VNI include researchers and scientists in the Commonwealth of Virginia who are involved in basic or translational research on the nervous system and related fields, along with clinicians who provide care for individuals with neurological disorders. This searchable database includes contact information for each member and descriptions of their research interests & expertise.

CLINICAL TRIALS NETWORK

Physicians from our five clinical sites and researchers from our affiliated universities bring exceptional expertise to all aspects of basic research, clinical research, and clinical trials. Functioning as a single entity, the Clinical Trials Network is capable of rapidly screening and enrolling participants for clinical trials.

“The VNI generates new collaborations that lead to discoveries surrounding neurological disorders and streamlines the processes to facilitate research by our scientists and physicians here in Virginia.”

– *Randall Merchant, Ph.D.*
VNI Program Manager

WHY JOIN THE VNI?

- Connect freely with other VNI members to share knowledge and expertise
- Join Interest groups centered on specific research areas, neurological disorders, and funding opportunities.
- Access core research facilities at participating VNI institutions.
- Stay informed on upcoming seminars and conferences
- Stay informed of funding opportunities
- Participate in multisite research studies
